

Breath Freshening and Oral Cleansing Product

Abstract

Oral products containing the combination of essential oils for oral cleansing, breath freshening and anti-microbial benefits. The combination of essential oils are such that a synergism is observed in anti-microbial activity. The oral products of this invention are chewing gums, confections, mouthwashes, mouth sprays and edible thin film products. In effective amounts, the combination of essential oils is delivered in an oral product for convenient oral cleansing and breath freshening benefits.
